DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamazaki et al (US. 6,302,910).

Yamazaki discloses a sliding contact seal structure, having a shaft member having a sliding contact surface that comes into contact with a seal member (41) formed from urethane or fluoro-resin or PTFE or polyurethane or like materials. The sliding contact surface is defined to have a surface energy of 50 dyne/cm or less for contact with the seal member (the shaft is made of stainless steel and is coated with a coating of nickel and polytetrafluoroethylene). The sum of the surface energy of the seal member and the surface energy of the shaft member is 95 dyne/cm or less (this is the case since the seal is made of polytetrafluoroethylene and the shaft has a coating of nickel and polytetrafluoroethylene).

The limitations in claim 3 are considered to be product by process limitations and are given little patentable weight in an apparatus claim (the film forming material formed by any one of chemical deposition, plasma CVD, physical vapor deposition, vacuum deposition, and sputtering).

Art Unit: 3673

Response to Arguments

3. Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

Furthermore it is pointed out that the reference of Shrontz reads on the claims 1-3. The reference call for a seal made of SP1 Garlock, which is a material that applicant's seal is made of. Furthermore evidence is pointed out by JP 56016698A that chromium oxide has a 36 dyne/cm.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Turner, Jr. et al. and JP 56016698A.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vishal Patel whose telephone number is 571-272-7060. The examiner can normally be reached on 6:30am to 8:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather C. Shackelford can be reached on 571-272-7049. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
